EMERGENCY AID		
MEDICOVER HOTLINE		
Emergency information (day and night)	+	+
EMERGENCY SERVICE		
The Emergency Service is provided in the case of a sudden illness or an accident within the Area where the benefits are provided. Calling the ambulance takes place via the Medicovert Hotline, whose dispatchers determine whether it is justified to send an ambulance based on the obtained information.	+	+
HOME VISITS		
Home visits (of a family doctor, internist or paediatrician) are provided in the case of a sudden illness or an accident within the Area where the benefits are provided. Making appointment for a home visit takes place via the Medicovert Hotline, whose dispatchers determine whether a home visit is justified based on the obtained information.	+ (limit: twice a year)	15 PLN (limit: twice a year)
CONSULTATIONS OF EMERGENCY CARE PHYSICIANS		
Consultation of surgical emergency care physician	+	15 PLN
Consultation of general emergency care physician	+	15 PLN
Consultation of orthopaedic emergency care physician	+	15 PLN
Consultation of paediatric emergency care physician	+	15 PLN
Consultations of emergency care physicians are provided in the case of a sudden illness or an accident, even outside the working hours of Medicovert Centres. All emergencies should be reported to the Medicovert Hotline, whose dispatchers will determine, on the basis of the obtained information, whether it is necessary to provide emergency care and will indicate the place of its execution.

OUTPATIENT PROCEDURES Available on the basis of a referral issued by a physician of a Medcover medical centre.		
NURSING PROCEDURES		
Urine analysis - urine dipstick test	+	+
Capillary cholesterol level - strip test measurement	+	+
D-dimer – test strip	+	+
Blood glucose fingerstick capillary measurement	+	+
Glycated haemoglobin - dipstick test	+	+
Inhalations on an emergency basis in an outpatient setting	+	+
Enema	+	+
Capillary lipidogram - strip test measurement	+	+
Blood collection	+	+
Administration of ophthalmic drops	+	+
Intranasal administration of the drug	+	+
Oral drug administration	+	+
Per rectum drug administration	+	+
Measurement of blood pressure	+	+
Strep A test	+	+
Strep A test Quik Read	+	+
Actim CRP test	+	+
Quantitative CRP QuikRead test	+	+
Troponin test	+	+
Quantitative Troponin Test	+	+
Oxygen therapy on an emergency basis in an outpatient setting	+	+
Tick removal	+	+
Venflon removal	+	+
Nursing procedure	+	+
INJECTIONS		
Intramuscular/subcutaneous injection	+	+
Intravenous injection	+	+
Drip	+	+
I.V. catheter placement	+	+
LARYNGOLOGICAL PROCEDURES		
Minor procedures/exchange of drain/bandage	+	+
Evacuation of auricular concha haematoma	+	+
Auditory meatus abscess incision	+	+
Auricular dressing	+	+
Ear irrigation	+	+
Anterior nasal tamponade	+	+
Anterior nasal tamponade, bilateral	+	+
Foreign body removal from the ORL region	+	+
Nasal tamponade removal	+	+
Cerumen removal	+	+
SURGICAL PROCEDURES		
Percutaneous biopsy of subcutaneous lesion	+	+
Electrocoagulation of skin lesion / mucous membrane	+	+
Next rinsing of wound/abscess	+	+
Cryosurgical skin lesion removal	+	+
Incision and drainage of cutaneous and subcutaneous haematoma	+	+
Incision and drainage of cutaneous and subcutaneous hematoma, in children	+	+
Incision and drainage of cutaneous and subcutaneous abscess/paronychia	+	+
Incision and drainage of infections of skin and subcutaneous tissue wounds	+	+
Incision and removal of cutaneous and subcutaneous foreign body	+	+
Incision and removal of cutaneous and subcutaneous foreign body, in children	+	+
Abscess incision (limb)	+	+
Breast abscess incision	+	+
Incision of paronychia of finger or toe in children	+	+
Necrectomy under ambulatory conditions	+	+
Cutting or paring of hyperkeratotic lesions (e.g. corn or callus), in children	+	+
Prepuce separation under surface anesthesia (EMLA)	+	+
One skin tissue sample collection	+	+
Skin tissue sample collection	+	+
Simple superficial skin wound closure, up to 10 cm, in children	+	+
Simple superficial skin wound closure, up to 5 cm, in children	+	+
Abscess, haematoma, blister or skin/subcutaneous tissue aspiration puncture	+	+
Wedge resection of ingrown nail	+	+
Preputial stretch	+	+
Pudendal labia separation under surface anesthesia (EMLA)	+	+
Foreign body removal	+	+
Removal of skin nodules (atheroma, fibroma, lipoma), in children	+	+
Tick removal with incision	+	+
Fingernail removal	+	+
Removal of the nail plate, partial or total	+	+
Removal of the nail plate, partial or total, simple; single, in children	+	+
Removal of melanocytic or vascular skin lesions under local anaesthesia, in children	+	+
Removal of cutaneous papillomas	+	+
Initial or subsequent treatment, second degree burn, local treatment (dressing), adults	+	+
Initial or subsequent treatment, second degree burn, local treatment (dressing), below 1 year old, in children	+	+
Initial or subsequent treatment, second degree burn, local treatment (dressing), above 1 year old, in children	+	+
Initial or subsequent treatment, first degree burn, local treatment (dressing), adults	+	+
Initial or subsequent treatment, first degree burn, local treatment (dressing), below 1 year old, in children	+	+
Initial or subsequent treatment, first degree burn, local treatment (dressing), above 1 year old, in children	+	+

	CONTINUUM ☐	CONTINUUM ☐
Cutting of hyperkeratotic lesions (e.g. corn or callus)	+	+
Resection of a small subcutaneous lesion up to 1,5 cm	+	+
Resection of a small skin lesion up to 1,5 cm	+	+
Resection of a fingernail and wedge resection of a nail wall, in children	+	+
Resection of a single pigmented naevus, in children	+	+
Resection of a medium subcutaneous lesion over 1,5 cm	+	+
Resection of a medium skin lesion over 1,5 cm	+	+
Resection of a subcutaneous/skin lesion over 3 cm without plastic surgery procedures	+	+
Curettage/destruction of a skin lesion	+	+
Application/change of large dressing	+	+
Application/change of dressing	+	+
Application/change of burn dressing	+	+
Stitches removal	+	+
Wound sewing up to 3 cm	+	+
Wound sewing over 3 cm	+	+
Facial wound sewing up to 3 cm	+	+
Local infiltration anesthesia for a procedure	+	+
ORTHOPAEDIC PROCEDURES		
Aspiration/injection intracystic, intratissual	+	+
Periarticular block	+	+
Incision of hematoma and drainage	+	+
Fracture reduction without internal stabilization	+	+
Fixing plaster bandage	+	+
Fixing plaster bandage (crus)	+	+
Fixing plaster bandage (forearm/arm)	+	+
Fixing plaster bandage (hand and forearm)	+	+
Fixing plaster bandage (thigh/crus)	+	+
Fixing plaster bandage immobilising the knee	+	+
Popliteal fossa puncture under USG guidance	+	+
Joint puncture with or without drug injection	+	+
Joint puncture with or without drug injection, in children	+	+
Joint/cyst puncture	+	+
Joint/cyst puncture with drug injection	+	+
Intraarticular drug injection	+	+
Gypsum plaster application - big	+	+
Gypsum plaster application - small	+	+
Application of Jewett corset, lumbar corset with laces, thermoplastic mass	+	+
Application of Jewett corset, lumbar corset with laces, thermoplastic mass in children	+	+
Application and adaptation of soft orthopaedic collar	+	+
Application and adaptation of rigid orthopaedic collar (e.g. Philadelphia type)	+	+
Application of a synthetic plaster bandage	+	+
Application of a Kramer splint	+	+
Application of long orthopaedic stabilizator on lower limb, upper limb	+	+
Application of long orthopaedic stabilizator on lower limb, upper limb, in children	+	+
Application of short orthopaedic stabilizator on lower limb, upper limb	+	+
Application of short orthopaedic stabilizator on lower limb, upper limb, in children	+	+
Application of an orthopaedic stabilizator on trunk and shoulder girdle	+	+
Application of a trunk or upper limb orthosis	+	+
Application of a trunk or upper limb orthosis	+	+
Application of a trunk and shoulder girdle orthosis	+	+
Application of a trunk and shoulder girdle orthosis	+	+
Stabilization dressing removal	+	+
GYNAECOLOGICAL PROCEDURES		
Laser ablation of cervical lesions	+	+
Vaginal mucosal membrane biopsy; after colposcopy	+	+
Vaginal and pudendal condyloma cryotherapy	+	+
Cryotherapy of uterine cervix lesions	+	+
Cervical erosion treatment - electrocoagulation	+	+
Cervical erosion treatment - cryotherapy	+	+
Cervical erosion treatment - laser	+	+
Cervical erosion treatment - solcogyn	+	+
Fiblaferon bandage	+	+
Ectocervix tissue sample collection with endocervical curettage	+	+
Ectocervix tissue sample collection with endocervical and uteral curettage	+	+
Removal of the intrauterine device	+	+
Application of the intrauterine device	+	+
UROLOGICAL PROCEDURES		
Catheterization of the urinary bladder	+	+
Prepuce separation, in children	+	+
Dissection of labial adhesions (synechia), in girls	+	+
Laser removal of penile condyloma	+	+
Replacement/removal of a catheter	+	+
SURGICAL PROCEDURES		
Cytology sampling	+	+
Smear collection for culture	+	+
Cervical smear collection	+	+
Vaginal smear collection	+	+
Catheterization of the urinary bladder, in children under 16 years of age	+	+
OTHER OUTPATIENT PROCEDURES		
Dermatoscopy	+	+
Cryotherapy with liquid nitrogen N2	+	+
DIAGNOSTIC TESTS		
Available on the basis of a referral issued by a physician of a Medcover medical centre.

PREVENTIVE VISIT		
A preventive visit is the first-time or annual appointment with the patient's personal physician (internist or family doctor), during which the physician conducts a review of the patient's medical history, a physical examination, and recommends appropriate examinations suitable for the age and gender of the patient based on the Prevention Standard. In the case of additional risk factors or chronic diseases in patient's family, including oncological diseases, the physician determines the scope of preventive examinations individually. Due to continuity of care provided by the patient's personal physician, during the preventive visit, it is possible to commission performance of examinations necessary for the proper treatment of the patient's chronic diseases.	+	15 PLN
